and
Unstinted Aid
of

DR. J. BEN ROBINSON, D.D.S., F.A.C.D.

Always cheerfully extended to us
during our professional student years.

Dedication ...

BY THIS dedication the faculty and the student staff alike enthusiastically grasp the opportunity to acknowledge a long and worthy term of service on this, the twenty-fifth anniversary of Dr. Robinson's graduation from the institution which he has served as Dean for fifteen years. Our Dean has considerately and wisely guided students in this institution since he accepted the office of Dean of the School of Dentistry and began molding the School to fill the notable place it holds today among similar institutions. To a man who stands foremost in our respect and admiration, we dedicate this book.

ADVERTISEMENTS

The School

The First Dean

Dr. Chapin A. Harris

DR. CHAPIN A. HARRIS, one of the true fathers of dental education, was born in New York. Little is known of his life until 1820 when he began the study of medicine. Dr. Harris commenced his medical practice in Ohio in 1823, but for several years gave little attention to dentistry except to extract and clean teeth and to insert a few fillings. In 1827 he began to practice dental surgery exclusively.

In 1833 Dr. Harris moved to Baltimore and opened a practice. In 1840, with the help of Dr. Horace Hayden, he founded the Baltimore College of Dental Surgery, of which he became the first dean.

Dr. Harris was greatly beloved by the profession for which he labored as a practitioner, writer, and teacher for more than a quarter of a century.

Our Own Dean

Dr. J. Ben Robinson

DR. J. BEN ROBINSON was born on a small farm near Clarksburg, West Virginia, April 16, 1883. He received his early education in the public schools of his native state. After teaching in the rural schools for three years, Dr. Robinson entered Marshall College, in Huntington, West Virginia, from which he graduated with honors in 1908. The following three years he spent in high school teaching and in special work in science and mathematics at West Virginia University.

In 1911 Dr. Robinson entered the University of Maryland, School of Dentistry, where he distinguished himself as an excellent student and a leader in scholastic activities. He graduated in 1914, winning the University Scholarship Gold Medal.

Dr. Robinson has taken a keen and active interest in the advancement of the dental profession, particularly in Maryland. From 1914 to 1921 he successively held the positions of Instructor and Professor of Clinical Dentistry and Professor of Operative

Dentistry at the University of Maryland. In 1921 he resigned to devote his full time to private practice. However, in 1924 Dr. Robinson again became actively associated with the School when he was appointed Dean, succeeding Dr. T. O. Heatwole.

Dean Robinson is nationally recognized for his achievements in the dental profession, having acted in an advisory capacity for both the federal and state governments. He has also played a prominent part in fraternal affairs, having served as Supreme Grand Master of Psi Omega Fraternity since 1931. Dr. Robinson's name now appears in *Who's Who;* he is one of the few of his profession to be so recognized.

The Dean's Messsage

"Any arrangements which in any considerable degree prevent superiority from profiting by the rewards of superiority or shield inferiority from the evil it entails—any arrangements which tend to make it as well to be inferior as to be superior are arrangements diametrically opposed to the progress of organization and the reaching of a higher life."

HERBERT SPENCER.

Our University's President

HARRY CLIFTON BYRD, after a colorful career, now reigns as president of the University of Maryland. He was born in Somerset County, Maryland, in 1889 and attended Crisfield High School, later being graduated from the Maryland School of Agriculture.

During his undergraduate days, he received athletic major letters from four colleges: University of Maryland, Georgetown, Western Maryland, and George Washington.

As an athlete, he was outstanding in football, track, and baseball. Thus it is no wonder that in 1913 he became athletic coach, and added to this, by virtue of his scholastic attainments, Instructor in English and History at the University of Maryland.

Later he gave up teaching and became director of athletics, in which capacity he organized a department combining both athletics and physical education.

During the war he organized and directed the Students' Training Corps Section at College Park. In 1918 he was made assistant to Dr. A. F. Woods, President of the University.

Through his efforts in the State Legislature, he was instrumental in the merging of the State Schools of Law, Medicine, Dentistry and Pharmacy into one body as the University of Maryland.

When Dr. Raymond Pearson succeeded Dr. Woods in the Presidency, Harry Byrd remained as assistant. In 1936 Dr. Pearson resigned and Dr. Byrd, formerly athletic director, became President over the great enterprise which is the University of Maryland.

Governor of Maryland

GOVERNOR HERBERT R. O'CONOR was born in Baltimore, November 17, 1896. His early education was obtained at St. Paul's Parochial School and Loyola High School. Loyola College graduated him with the degree of A.B. In 1920 he received his LL.B. from the University of Maryland, and in 1924 Loyola conferred on him the degree of Doctor of Laws with the tribute inscribed on his diploma "To the youngest Doctor of Laws in the U. S."

In 1921 he was appointed Assistant State's Attorney, and in 1923 by the appointment of the late Governor Ritchie, he was made People's Counsel of the Public Service Commission. By the election of the following November he was chosen State's Attorney by a majority of 35,000. This position he held until elected Governor of Maryland in 1938.

Those who know him attribute his success to keen analytical powers, systematic hard work and untiring energy.

Among the societies and clubs that boast his membership are Phi Sigma Fraternity, City Club, Knights of Columbus and the Loyal Order of Moose.

Our Administrative Assistant

KATHARINE TOOMEY

SAINT APOLLONIA may be the patron saint of dentistry, but as students we look to Saint Katharine. It is she who keeps the troubles of our school life in order, helping when aid is most needed, reprimanding when it is deserved. While moving in an atmosphere of efficiency, she has an affable salutation for all. Through her warm personality, that characteristic of all administrative offices—cool impartiality—is tempered into individual cordiality.

When our degrees are conferred, we shall at the same time accept the patronage of Saint Apollonia. But we shall always cherish that patron of our student days—Saint Katharine.

Our Director of Admissions

WILLARD M. HILLEGEIST

OUR great regard for "Hillie" is based on the fact that he decided our eligibility for the dental curriculum. But more than gratitude endears him to us, for it was his cordial welcome to apprehensive would-be dentists which set us at ease and introduced us to a new friendship. Though we see him too seldom, he forgets semester hours and prerequisites when we meet, and crowds a friendly chat between busy moments.

When we share the honor and excitement of graduation with our families and the faculty, we shall not forget the man who helped make it possible. "Hillie's" signature will not be on our diplomas, but his name will be indelibly inscribed on our memories.

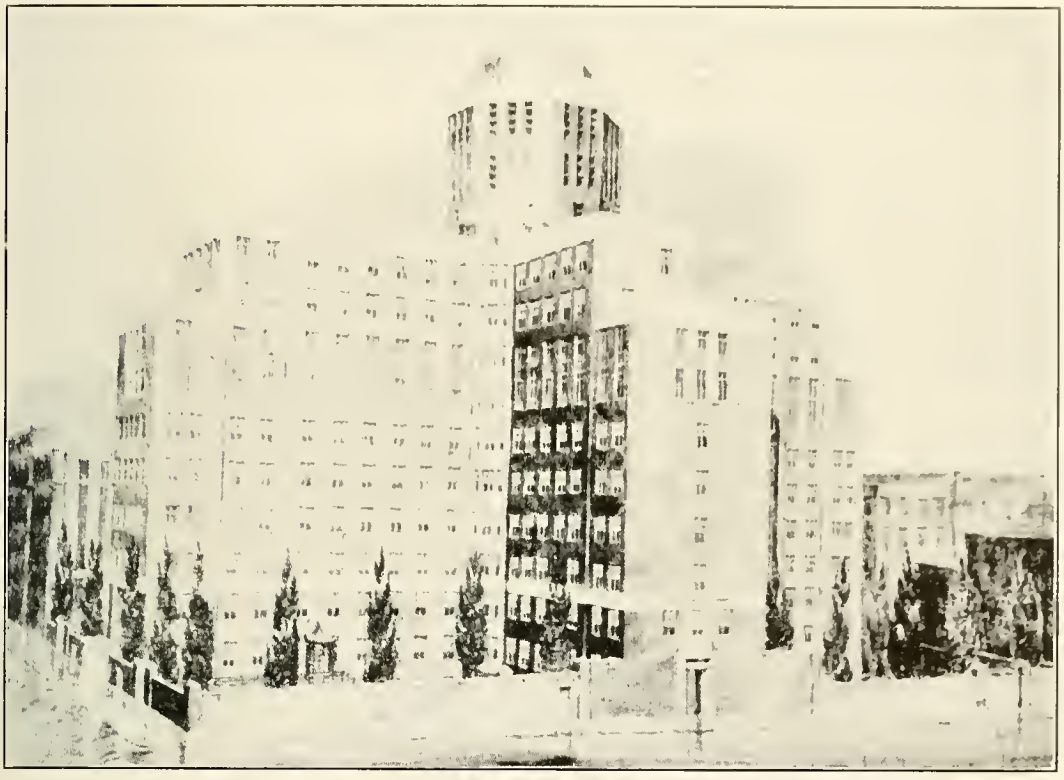
Our School Before New Alterations Began

THE first lectures on dentistry in America were delivered by Dr. Horace H. Hayden in the University of Maryland, School of Medicine in 1821. With Dr. Chapin A. Harris he proposed the establishment of a dental department as a branch of medical study. Unsuccessful in this venture, the two men founded the Baltimore College of Dental Surgery in 1840. Thus was the first and oldest dental school in the world created as the foundation of the dental profession.

The University of Maryland organized its dental school in 1883. Growth was rapid and in 1923 it merged with the Baltimore College of Dental Surgery. This newly formed institution became a distinct department of the University under State supervision, and occupied the building of the old University of Maryland Dental School until 1928, at which time the present building was completed. A modern structure in every detail, it is furnished with new equipment throughout and possesses every accommodation necessary for satisfactory instruction with comfortable arrangements and in pleasant surroundings. All basic phases of dentistry are presented practically in the individual clinical departments which have been provided.

At present a large, two-story wing is under construction. This wing will allow a two-fold increase in the facilities of the diagnosis department. Both the radiodontia and exodontia clinics will be expanded. Prominent space for the museum will be provided, and the administrative offices will be transferred. It is expected that this addition will precede the establishment of post-graduate courses, the need of which has been felt for many years.

Concomitantly with physical expansion, the school has developed educationally. It is a dental college with the highest rating. And even now, the curriculum is being altered, so that as time goes on and knowledge of dental science increases, Maryland graduates will continue to hold the high place in the dental profession which they have always maintained.



Hospital Before New Alterations Began

THE UNIVERSITY HOSPITAL, which is the property of the University of Maryland, is the oldest institution for the care of the sick in the state of Maryland. It was established by the School of Medicine in September 1823 to provide adequate clinical instruction for the students. Located on the southwest corner of Lombard and Greene Streets, it was originally known as the Baltimore Infirmary. In 1897 this structure was replaced by an up-to-date building, much larger, and thoroughly equipped. At this time the name of the institution was changed to University Hospital.

In time the various clinical departments became overcrowded and the larger numbers of patients could not be accommodated. A new edifice was planned, and in 1934 the new University Hospital was completed. The old building is still in use, however, by the out-patient department. The new structure is situated on the southwest corner of Redwood and Greene Streets and adjoins the pharmacy and dental schools. The architectural style is that of ultra-modern simplicity. Rising fifteen stories above the ground, the center tower is a landmark on the Baltimore skyline.

At this time a two-story addition is being built above the tenth floor. The eleventh floor when completed will be composed of private rooms. The twelfth floor will furnish quarters for the internes.

The hospital is ideally arranged and equipped for patient care and instruction to the schools of medicine, dentistry, and nursing. Regular assignments to the department of oral surgery and to the hospital dental clinic are interesting and instructive features of the senior curriculum in the school of dentistry.

Regarded as one of the finest in the country, the University Hospital has contributed much to the world-wide recognition which Baltimore has won as a medical center.

The Harris-Hayden Plaque from the Stairway

In Remembrance of Chapin A. Harris and Horace H. Hayden, the above plaque was placed on the wall facing the door of the main entrance to the Dental School. To these two men the dental profession owes an everlasting debt of gratitude, since they realized the importance of dentistry as a definite branch of medical science and founded the Baltimore College of Dental Surgery, the first organized dental school in the world.

Both Horace Hayden and Chapin Harris practiced dentistry in Baltimore; and, at one time, Dr. Hayden delivered a scheduled series of lectures on dentistry to the student body of the University of Maryland Medical School.

In 1840 Harris and Hayden, in conjunction with several other outstanding dentists of the time, obtained a charter from the State of Maryland and founded the first dental school.

This plaque was executed by Ernest W. Keyser, who modeled in life-size relief, after two family portraits, likenesses of the heads of these two men. Two tablets were cast in bronze and dedicated in the winter of 1901-1902, one being placed in the old B. C. D. S. and the other in the Dental Department of the University of Maryland.

Our Professional Library

THE early libraries of the Baltimore College of Dental Surgery and the Dental Department of the University of Maryland consisted of but a few donated volumes. However, when Dr. J. Ben Robinson became Dean of the combined Dental Schools, in 1924, he immediately united the libraries of both schools and arranged means for expansion. Meanwhile, the Clarence J. Grieves Library Foundation was established on May 4, 1926, by the Maryland State Dental Association. The books from this foundation were housed with those of the Dental School Library, and the resulting collection was called the Clarence J. Grieves Library Foundation. During the past year, the resources of the original Foundation were placed entirely under the control of the University of Maryland.

Throughout its relatively short history, the library has expanded so rapidly that it now ranks among the best of its kind. Its 7100 bound volumes and many unbound publications are housed in the stack-room adjoining the spacious reading-room. The library is managed by a staff of skilled librarians. The reading-room is an ideal locale for the enjoyment of recreative reading as well as for the pursuance of intensive study and research.

Where We are Interviewed by the Dean

IT WAS in this room that we first made the acquaintance of Dr. Robinson, and many of us can readily recall the anxiety and nervousness which accompanied our first appearance here, and how soon it left us after the friendly and reassuring greeting of the Dean. It is in this office that many students have found help and encouragement, simply because our Dean is always ready to give help to the students who bring their problems to him.

The Dean's office is comfortably furnished. Upon the walls are a number of portraits of early figures in Dentistry, portraits which are of great value and importance to the School. These portraits include those of Doctor John Greenwood, by Charles W. Peale, Doctor Horace Hayden, Doctor Chapin Harris, Doctor Eleazer Parmly, and many others.

One very interesting item, which aside from being valuable is unusual, is an oil painting of Doctor A. J. Volck, B.C.D.S., 1852. This painting was done by Doctor Volck himself upon a porcelain plate. Doctor Volck was an eminent painter, sculptor, art critic, and dentist. The portrait was presented to the Clarence Grieves Library Foundation by the Association of Dental Surgeons of Baltimore, through Doctor George E. Hardy, Sr.

The Scene of Many An Excavation

THE general operative dentistry clinic comprises the largest portion of the clinical wing of the School. The entire northern wall is devoted to window space which provides ideal lighting and affords a view of the University Hospital rising fifteen floors above.

The clinic is equipped with sixty-five chairs, units, and case stands. Since there is a like number in the senior class, each student is assigned to a chair which is his own "office" for the year. Here the student conducts his operative practice under the direct supervision of the operative faculty. Immediately adjoining are the pathology and pedodontia clinics. The other clinical departments are close at hand, affording all facilities for student instruction and patient care.

It is here that as juniors with nervous anticipation we received our first patients and began our clinical practice. Here we confronted practical problems, made mistakes, learned to correct them, garnered invaluable advice from our experienced instructors, and enjoyed the satisfaction of work well done. As we go into our own offices we shall remember fondly those two, long, memory-laden years spent in the operative clinic.

Wall Memorial and Showcase

Dr. M. Whilldin Foster was born in Philadelphia on May 17, 1837. After preliminary education he began the study of dentistry in 1854 as a private pupil of Dr. Jesse Green. He later attended the Philadelphia Dental College for one session. Following this he practiced dentistry for two years in Indiana and Pennsylvania. In 1861 he moved to Baltimore and practiced five years in partnership, then established his own practice which he maintained for more than forty years.

When the Maryland Dental College of Baltimore was created in 1873, Doctor Foster was made professor of dental mechanism and metallurgy. In 1879 when this school was merged with the Baltimore College of Dental Surgery, he was elected professor of pathology and therapeutics and was given the honorary degree of D.D.S. In 1894 at the death of Dr. R. B. Winder, Dr. Foster became dean of the B.C.D.S. He occupied this post until a short time before his death on June 30, 1914.

The showcase contains a large number of extracted teeth which are of interest because of various anomalies. These are made up of contributions from students and faculty alike for the past few years.

Where We Build Bridges

THE crown and bridge laboratory is the scene of what is perhaps dentistry's most fascinating work. Here, gold and porcelain restorations take form in the hands of the students under supervision of Drs. Hurst and Nuttall. It is adjacent and convenient to the prosthetic and crown and bridge clinic.

When oral preparation for a crown or bridge restoration has been made and such requisites as impressions, bite and shade have been secured, the student retires to the laboratory to construct the restoration. Fascinating to the student, almost miraculous to the layman, this work is detailed and requires skillful manipulation. The equipment and materials which modern science affords simplify difficult steps and are conducive to accurate results. Gold work is constructed with the care given to an intricate creation of jewelry. The operator must have an eye for symmetry and detail and must acquire the knack of working the precious metal—an art in itself. Porcelain work is even more demanding, requiring keen ability for differentiation and matching of shades, besides the attaining of proper form.

The development of these abilities constitutes a vital part of our dental education and will carry through our entire dental careers.

The Museum of the School

THE MUSEUM of the Dental School contains a valuable collection relating to all branches of dental science. One may trace, by means of the various collected items, the evolution of dentistry from early times to the present date.

The collection contains a number of early dentures, some of which were carved entirely from bone, others in metal. Perhaps most conspicuous in the entire set are the dentures worn by George Washington.

Among the curios is a small plush-lined box which contains the extraction instruments used by Chapin Harris. Except for the "key," the forceps embody the same principles in use today.

A large section of the museum is devoted to prize contributions of work done by students, some dating as far back as 1876.

The section devoted to Comparative Dental Anatomy includes shells of the large and the small animals which are supposed to be phases in the history of human denture evolution. Several human skulls are among those displayed, one of them being entirely disarticulated.

The section devoted to abnormal teeth is rather extensive. Here one may view a tooth that was extracted from the alveolar process of George IV of England, and another from Amedo I of Spain.

Old Church Memories

THE memories that once existed in connection with the "Old Church Building" are now but individual treasures of those who boast the unique pleasure of once having worked in its dusty old rooms. The Church building is gone but to countless, not forgotten. In its place will arise a modern building equipped for histologic, pharmaceutical and anatomical dissection studies.

At present the freshmen are working in the old dispensary hospital on Lombard Street. They occupy the third-floor wing and although the room is temporary, it boasts of twelve dissecting tables and countless anatomical drawings and models. For temporary quarters the room has been made exceptionally adequate for work. Lights have been placed over the bodies to enable better vision and through the efforts of "Eddie" the room is kept in fine condition.

We cannot forget the hours we toiled in a formalin-laden atmosphere as our instructors cracked a metamaphorical whip over our weary brains, yet withal tried to be as fair as the schedule allowed.

Where We Compounded Mixtures

THE chemistry laboratory is already familiar to all dental students when they begin their course in physiological chemistry. For this same laboratory with its smooth, blacktopped benches and rows of acid bottles previously contributed to our all too meager knowledge of organic chemistry. Even with the aromas from foul mixtures permeating the atmosphere, there is a kindlier feeling toward the lab, partly because physiological chemistry is the last chemistry course in the curriculum; but chiefly because it is a practical course amplifying our understanding of physiology. Assisted by Drs. O. H. Gaver, Dobbs, and D. A. Browning we attempted to reproduce in test tubes the everyday chemical reactions which that super-chemist Mother Nature performs constantly within the human body. It often took a long stretch of imagination to assure ourselves that a slight cloudiness was the thick precipitate and we still can't understand why some experiments came out wrong.

In spite of our shortcomings as chemists, the hours we spent experimenting in the lab illustrated comprehensively our physiology course, which makes up an important part of our dental education.

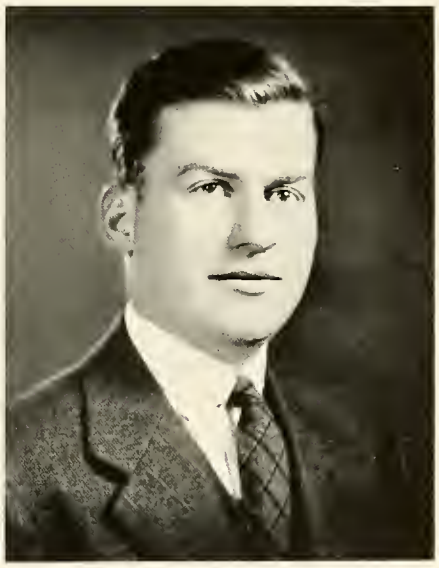
IRVING SOLWIN WEINER

"Irv"

HARTFORD, CONNECTICUT

Connecticut State College; Historian, '37; Treasurer, '38; Chairman House Committee, '39, of Alpha Omega Fraternity; Gorgas Odontological Society; Class Vice-President, '39.

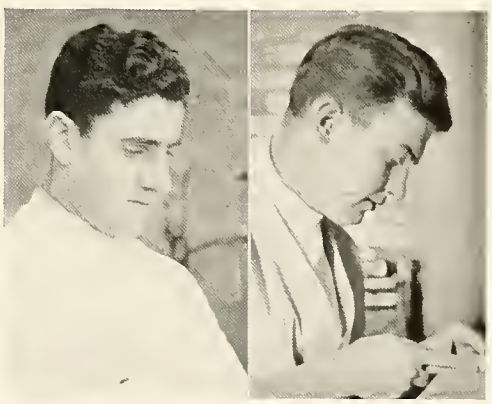


JOHN HOFFMAN WOODEN, JR.

"Jack"

BALTIMORE, MARYLAND

University of Maryland, Baltimore; Chairman Spring Formal Committee, '39, of Psi Omega Fraternity; Gorgas Odontological Society; Class Treasurer, '35 and '36; President, '37, and Chairman June Week Committee, '39.



DAN WRIGHT

"Dam"

GREENVILLE, NORTH CAROLINA

East Carolina Teachers College, A.B.; President, '38 and Treasurer, '39, of Delta Sigma Delta Fraternity; Speakers' Committee, '39, of Gorgas Odontological Society; Class Dance Committee, '38.

As Freshmen, 'twas anticipation,
Sophomores, partial realization,
Juniors, some participation,
Seniors, it was graduation.

For Frosh and Soph, it was no fun,
For Junior, naught but rush and run;
As Grad—this is no idle pun—
Your work, though done, is just begun.

RILEY WILLIAMSON, '42.

Senior Class History

GONE are the dear, dead days, but not beyond recall. We still remember our initiation into things Dental when the first day sent us to the anatomy dissecting room. 'Twas an eerie sight. The family atmosphere created by Drs. Hahn, Wilkerson, and Berman was touching. And how!! Oh, what a team were Gorsuch, Jakob, "Jesse" James, and "Eichen-Dunn." But anatomy was *only* one course.

Oh well, it all came out in the summer. Rumor had it that Baltimore was hot that year—according to Dr. Starkey.

1936-1937

And now we're getting somewhere. We're smart—we're sophomores. No more gas, no more woes.

What a time we had between labs and lectures. Not seeing the light of day for four months was an experience. Ask Tinsley. He almost rolled into a truck on several occasions skating to school in the dark those early mornings. We wonder how Plaster kept up with him; but Harold always was a fast man—especially when after chalk for the instructors. Dr. Gaver's *tremenjous* gift of exemptions at finals was much appreciated. 'Twas a flighty year—verily.

1937-1938

We're in the clinic now, and with real, live patients, too. Many a hand-piece had the jitters those first few weeks, and many didn't at all. There was some mention of a number—775 it was, rumored to be a points requirement. It was.

And those white gowns sparkled so in their newness. We thought Tony was going to blow up until Dr. Douglas Browning deflated him with a pin. Rogers was overheard speaking to Melson, "Don't you think these gowns are becoming to my hair, Bill? I do." And Auerbach finally started to talk to the boys again after the first few weeks.

1938-1939

We are seniors we are told. Ah, 'tis unbelievable, especially when Drs. Ide and McCarthy collaborated in eradicating the point system. But we still remember the purge—four requirement charts by mid-year.

But we shall ever fondly recall—

The senior lab quartet of Francis, Stinebert, Varipatis, and Wooden,
The perennial late entrances of Gorsuch, Miller and Krug,
The fine scholarship of Blevins, Chan-Pong, Francis, Randolph, Plaster and Myers,
The outward silence of Brown, "Sleepy" Feindt, and Schoepke,
That grand, good fellowship of Randolph, Johnson, and Chan-Pong,
That infectious, good-natured laugh of Weiner's,
That happy husbands society of Aaronson, Cannaday, Fallon, Francis, Johnson, Myers, and Sidoti,
That Southern drawl of our rebel faction—Plaster, Tinsley, Cannaday,
That dialect of our Yankee chum, Schriver,
And Cliff's "fat like butter" and "in the groove."

We shall be forever grateful for the much appreciated cooperation and encouragement given us by the ladies of the clinical staff and the instructors on the clinic floor.

We look forward with much anticipation to June Week affairs, the Senior Banquet and Dance, announcement night and commencement. Here's hoping mortality is absent.

Go forth into the busy world
and love it, interest yourself
in its life, mingle kindly with
its joys and sorrows. Try what
you can do for men rather than
what you can make them do for
you, and you will know what it
is to have men yours, better
than if you were their King
or master.

Brook Herford.

With every rising of the sun
Think of your life as just begun.
The past has cancelled and buried deep
All yesterdays—there let them sleep.
Concern yourself with but today,
Grasp it, and teach it to obey
Your will and plan. Since time began
Today has been the friend of man.
You and today. A soul sublime,
And the great heritage of time.

This is the day which the Lord hath made.
We will rejoice and be glad in it.

Underclassmen

Front Row—E. L. Pessagno, G. A. Lowander, J. T. Bonham, B. Randman, B. Litchman, H. L. Westcott.

Second Row—J. A. Piccolo, S. A. Belinkoff, J. I. Kasawich, J. B. Bookstaver, B. A. Dabrowski, S. Goldhaber, B. Diamond.

Junior Class Chronicle

Thirteen of us—isn't that enough in itself to make the present Junior Class unique? At least, that's the number with which we started the school year; we sincerely hope that the passage of time does not decrease our membership, for our associations have been very pleasant during our three years together. Then, too, next year marks the 100th anniversary of the Dental School, with our class as the 100th to graduate.

It was grand to return again in September and see the old faces and places. Even the instructors seemed to welcome us with open arms. But their faces soon became grim when they saw us trying to learn the rubber dam technique; there wasn't one of us who did not take a silent oath, then and there, never to use the dam after graduation. The next thrill came when we wore our new white gowns for the first time. All of them fitted beautifully, and they certainly were more glamorous than those old laboratory gowns that we practically lived in for our first two years. But this delightful sensation lasted only about ten minutes, because Mrs. Carroll lost no time in coming up the stairs from the Prosthetics Clinic to assign all of us our first plate repairs. It was then only a short while before we were back in the Senior Lab sweating over a bunsen burner again.

B. Randman
President

Most of us had taken and passed the Board Partial Examinations of our various states, so that we felt as if we had a comfortable year ahead of us—plenty of work, but no overhanging worry about strange examinations to spoil our spring.

It was a big leap and a bound from endoforms to the mouth of our first patient; but we were surprised to find that it was not so bad as we thought it would be. "The first ten patients were the hardest!" In addition, the system was changed somewhat, so that at present there are no specified requirements in points for this year. Still, we do wish we could get over that uncomfortable feeling about having so few gold foil points.

Dr. L. W. Fetter left us a few weeks after the opening day, choosing to go back into his private practice. Dr. Fetter was one of the best friends our class has ever had. We can still hear him in those Dental Anatomy Labs with his "This is the worst class in the history of the school!" And to prove how stupid we were, he gave us all B's. We miss him on the clinic floor, where we had only a limited time to observe what a splendid workman he is; but we feel sure that this same quality will carry him far in his new venture.

Shortly after we were under way, class elections were held. Those men elected are fortunate—it doesn't take much trouble to govern the other six.

We have so far attended only two School social events. The first was the annual Dental School Dance held at the Maryland Casualty Clubhouse on October 14. All of us had a swell time, even though two of the Class arrived just in time to hold open the door for those of us who were leaving at 1:30 A.M.! This dance is always the School's best affair.

The second event was the Gorgas Odontological Society Initiation Banquet and Dance, at the Southern Hotel. This was the true dance of the year for most of us, for all but a few were accorded the honor of wearing the Key. We hear that the Gorgas Spring Dance is even better, so we are looking forward to it

Thanksgiving—and we took a deep breath. It was the first recess in our busy Junior schedule. Most of us came back in time to go home for the Christmas holidays. Coming back to school after those glorious days was the hardest thing we have had to do yet, because those ten Midyear examinations stared us full in the face. They promised to be quite detailed and were downright tough. Still, we did do our best. Maybe the guardian angel that's been with us for these three years will still continue to do his stuff on the finals.

As a parting message, we wish to felicitate the graduating class on their approaching commencement; and we forgive them for borrowing half of our equipment for the past year. We hope that they will have the best of luck, and we ask of them but one thing—please let us in on the secret of your success before you graduate!

E. L. Pessagno.

1. Randman, don't miss!
2. The blood's on, Pessagno.
3. Litchmen always did get all the pretty ones.
4. Belinkoff tries a prophy(?).
5. Lowander, is that mayhem in your eyes?
6. Dabrowski, methinks thou hast thoughts of Ruthie.
7. Goldhaber, report to Dr. Walzak!
8. Pays to advertise. Right, Bonham?
9. Kasawich, hope Dr. Latcham can read it!
10. Aromatics will bring her back, Westie.
11. Ah-h! Fourteen points, Bookstaver.
12. Prophies are awfully good practice, Diamond.

1. Kasawich casts an inlay for the nth time.
2. Surprise, Gene!
3. Weazel Dabrowski rushing along.
4. Puzzle—pick out the brownest nose.
5. No patient, Mickey?
6. Litchman—he adores crown and bridge.
7. Westcott makes good use of a New England harpoon.
8. We think this might be Piccolo.
9. The mighty Lowander polishes a few retention holes in his plates.
10. Goldhaber takes it coolly.
11. Randman, isn't that Kasawich's spatula?
12. Belinkoff, who ever heard of casting a fish?

Sophomore Class Chronicle

THE firm, grim expressions on the Hayden and Harris plaque seemed to relax and become radiant with confidence and hope upon the return of our class. They must have eavesdropped a trifle and heard pleasant, hearty greetings and yarns of summer experiences being cast about the corridors.

It wasn't very long before we began the process of becoming intimate with more intricate and interesting problems relating to dentistry. Also, the strange and weary cycle of "floating instruments" was initiated once more, prevailing and expanding with time.

From our unruly and chaotic meetings, evolved a solution of problems and successful social events. The first meeting was devoted to the election of officers who eventually proved to be deserving of their positions.

Our yuletide deed (inaugurated in our first year) of providing needy families with Christmas baskets was happily repeated.

In February, the class dance was well attended and enjoyed; unusual spirits reigning throughout the hall because of the recent termination of mid-year examinations.

Throughout the year various incidents and personalities lightened our task, and together with acquired knowledge and delightful social events, will aid in recalling our sophomore year as profitable, eventful, and cheerful.

Everyone is eagerly awaiting his entrance to the infirmary. We are anticipating new and profitable experiences for our next two years.

Time and association have distinguished our group as being exceptionally intact, cooperative, and friendly.

M. DeScherer.

1. Weinger—"Now I push the first valve down."
2. Reusch—"I slowly slide it into the canal."
3. Berman—"Who wrote 'Lopuss' in this book?"
4. Hymanson—"And Mimsy's coming in tonight!"
5. Collins—"Boy, this baby can get hot."
6. Schultheis—"This bur must be dull."
7. McClees—"Anybody ahead of me yet?"
8. Birschtein—"I can't even read the handwriting."
9. Taub—"The rubber dam protects the fingers."
10. Dubansky—"This is the profile view, boys."
11. Chernow—"I was happy before I saw it in the light."
12. Tolley—"It's hurting me more than you."

1. Callaway—"That's right, doctor; take it in your hand."
2. Caldwell—"If something's there, I can't see it."
3. Friedman—"This is how I do it."
4. Frey—"So near, and yet so far."
5. DePasquale—"Front and center, that's me."
6. Heller—"Now, I would do it this way."
7. Hawkins—"It sho' looks good to me."
8. Hoffman—"I'm sure mine looked better."
9. Briskin—"Did you hear the one about the flood?"
10. Vitolo—"Now you hold it in your hand."
11. Storch—"She loves me, she loves me not."
12. DeScherer—"Must be in here someplace."

Freshman Class Chronicle

THE Class gathered together for the first time September 22, 1938 to take its first glimpse at the fundamentals of dentistry.

Unusually large in numbers, it is composed of sixty-five members, eighteen of whom have degrees, and five of whom are married. The ages of the various members range from eighteen to thirty-three, the average being twenty-one and a half years.

It was not long before a new vocabulary was acquired by one and all. The labs are still resounding with echoes of "Gosh, I'll have to carve my bicuspids over again—I bifurcated my root too high;" "He wouldn't accept it—the mesio-distal diameter of the neck was too short." "Rotate your cuspids;" "Is this an osteoclast I have here, Doctor?"

Early in the first semester, Dean Robinson gave an address of welcome. His remarks were both interesting and encouraging, as well as instructive, stressing the fact that conscientiousness and sincerity are necessary qualities required of a good dentist.

The school dance was held October 14, 1938, at which a favorable showing was made by the class. The large attendance, in addition to the syncopating rhythms of Bob Iula and his orchestra, added to the success of the affair.

On October 25, Dr. Ide, Professor of Operative Dentistry, spoke to the class on "Home-Coming Day at College Park." Dr. Ide took a vote on the plan that in the future there should be a dinner for the Freshman class before they attended their first classes, at which they would meet the members of the faculty. The vote was in the affirmative. If the plan goes into effect, a closer bond between instructor and student will thereby be effected.

Joseph T. Coroso, Jr.

1. Kolman and Hoffman, front view. The back is camera-shy.
2. Bressman and Briskin take the gals off their (?) feet.
3. Krieger, Liloia, Edwards and DiTrolio can already support a woman.
4. Alice and Mac take it easy for a while.
5. Just a happy group of "sitter-outers."
6. Goodwin and Ollman won't flunk this exam.
7. Entitled "Rattle Them Bones," with Savage and Schwartz.
8. Rogoff, Mass, and Nathanson take a bone in hand.
9. J. B. Powell doesn't need skin. He loves the bones.
10. Toomey, Miss Taubman and Tighe, cannibals all.
11. Rogoff wields a mean scalpel.
12. Mintz and Stoopack pose ready for action.

1. Roland once doled out chemicals to the freshmen.
2. Reynolds, Ralph, and their gals prepare to cool off.
3. Nussbaum the theatrical mask of comedy, holding two of tragedy.
4. Cliff opens the door at all dances.
5. Why, the man is all nerves—on the contrary, that's just the state he gets us in. Puzzle over his identity.
6. We can recognize Callaway and Corbitt.
7. Williams and Ralph. Not Eskimos, just laplanders.
8. Herman drinks his while Salutsky, Nathanson and Katz only wait.

Front Row—M. S. Yalovitz, B. Cooper, J. V. DiTrolio, R. K. Tongue, M. S. Wilkinson, Miss V. M. Moffett, M. P. Liloia, L. Krieger, H. S. Levy, H. F. Cerny, W. T. Greene.

Third Row—J. T. Reilly, J. J.Edwards, M. Stern, I. J. Cierler, J. M. Rothenberg, J. B. Zimmerman, E. E. K. Sauerman.

Second Predental Class Chronicle

E Barely had time to don our pants after the summer vacation and hurry back, with trunks and tennis racquets, to the last lap of our predental career.

"Mr. Foley will probably be tougher than ever this year," we groaningly thought. If it hadn't been for his inexhaustible supply of rare stories we could never have taken it the way he laid it on.

We'd heard a rumor that Dr. Starkey would make gas hounds of the best of us, and even Mike Liloia used to wonder what we were in for there.

It wasn't so tough when we got down to the steady grind again. Still, I don't recall where we did much loafing. Dr. Starkey was tough, all right; but a good fellow withal. He is determined to teach us organic chemistry and certainly makes it an important subject.

M. P. Liloia
President

The instructor in foreign languages, Mr. Parsons, must have thought we all expected to become natives of France or Germany, because we did our share of poring over his assignments. Previous Latin training proved a boon to a few of us, but with many it was conspicuous by its absence.

Physics is no longer a group of purgatives to us; we have achieved its correct scientific aspect as the result of proper application. We never realized a simple pulley could be so complicated. Some of the toys used in experiment harked back to childhood memories; but the required computations aged us swiftly.

In sociology we learned everything about nothing and managed a few arguments in the process. Who would have thought that just "living" could be such a complicated process?

We are all accomplished public speakers now; but Mr. Foley will never admit it. Just because a guy has his hands in his pockets doesn't mean his mind is far afield from that carefully prepared speech of his.

Sur-r-r-re and it wasn't all tough. The class dance offered a welcome break—and we broke everything but our necks. Ted Greene's conservative "jitterbugging" gave us all a mark to shoot for. The "sophomore strut" of Mike Liloia was the envy of every less handsome lad. Mike is so ready with his lessons that it doesn't seem possible he could dance like that.

The few who knocked over the hurdles at midterm have been studying for a chance to redeem themselves. I declare, those young men's fancies certainly turned this Spring. We were sure in the rut of hard work until that sunshine and those warm days stirred up the urge. Funny, sociology didn't tell us much as to what we could do about that.

The one last hazard of final exams lies between us and the beginning of our professional career. Providence willing, we shall all spend one last summer of repose before we settle down to that intensive four-year period devoted entirely to the study of dentistry.

L. Krieger.

1. What was Jack O'Meara doing when they snapped this?
2. The surprise of the season—Ted Greene an organic chemist.
3. Curly Cierler weighs in at the physics lab.
4. We're still wondering what Landes was doing with two books.
5. Can this be Levy, the floor-walker of organic lab, really working?
6. Martino doing a balancing act in chem lab.
7. Moscow Krieger looks and wonders.
8. Mike's hairy arm reaches into another picture.
9. Jimmy Reilly smiles while looking toward the nurses' home.

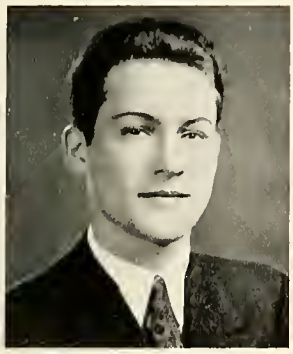
First Predental Class Chronicle

A Few days prior to September 22, the date of the 99th opening of the Baltimore College of Dental Surgery, we predental freshmen arrived to register in the University and complete other last-minute transactions. With little chance to orient ourselves to the ways of a new school, we were plunged immediately into a daily routine that seemed very difficult until we learned the knack of budgeting our time as do the more experienced upperclassmen. Consequently, we wore a dazed expression for the first few days. This shell-shocked look was resumed in January and again in May, just before finals. It seemed that in spite of our intentions to study weeks in advance, we had to turn to cramming as a last resort.

Having had ample time to become acquainted with each other we held an election, notably free of cliques, on November 9. William Carl Ebeling and Donald Fales, both of Baltimore, filled the offices of president and secretary. Harold Witman, who hails



W. C. Ebeling
President

OFFICERS

W. C. Ebeling . . . . . *President*
H. I. Witman . . . . . *Vice-President*
S. W. Kirshen . . . . . *Treasurer*
D. G. Fales . . . . . *Secretary*
O. Walker . . . . . *Sergeant-at-Arms*
M. H. Hollander . . . . . *Historian*
R. H. Smith . . . . . *Student Representative*

from Newark, became vice-president. The office of treasurer was assumed by Sanford Kirshen of New York; Delaware gained representation through Robert Smith, as student representative. There were only thirteen out-of-town students in this year's group of thirty-three predental freshmen.

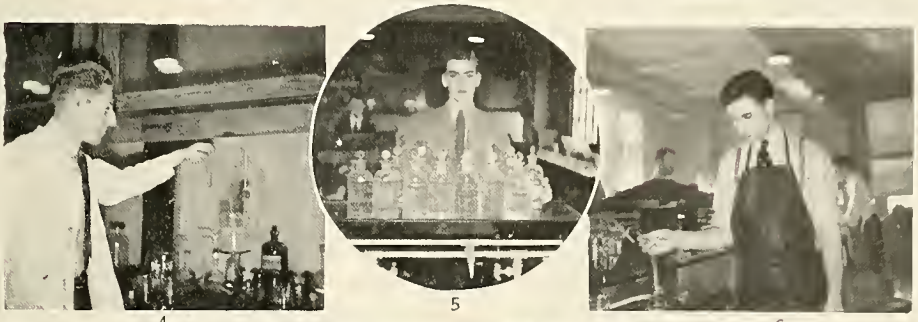
The general consensus of opinion seems to be that, because of the interesting nature of our studies, our first year at the University of Maryland has been thoroughly enjoyable. The work was not so difficult as to hamper our pursuit of pleasure on the weekends and during the welcome Christmas and Easter holidays, at which times locker contents were buried in the traveling bags of scholars about to depart. The atmosphere of a professional school is penetrated by a spirit of seriousness, which we often alleviated with our moments of fun in the chemistry and zoology laboratories, and with our self-styled humor in the lecture halls.

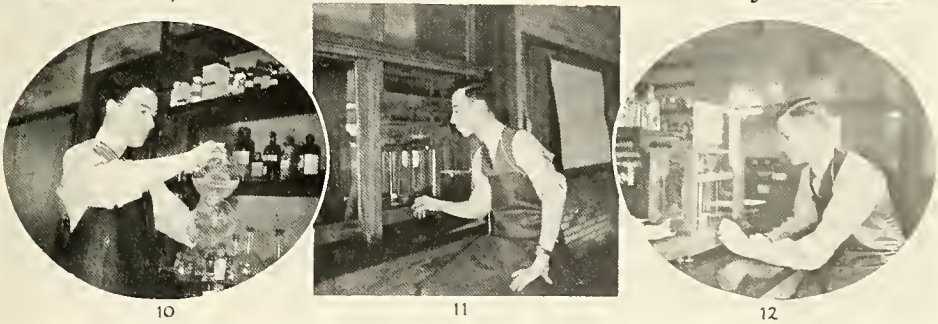
The freshman predental students turned out en masse at the Maryland Casualty to dance to the strains of Bob Iula's orchestra at the first formal of the year, sponsored by the combined classes of the dental school. In April, Levering Hall was the scene of a formal dance, a combined social, held by the first and second-year predental classes.

In retrospect, we are obliged to remark that our satisfaction at having the first leg of our journey safely stowed away under our belt is complete.

Morton H. Hollander.

1. Hollander—class historian, who knows us too well.
2. Feit—friendly and cheerful in spite of his name.
3. Smith—Snuff, the Feather Merchant from God's Delaware.
4. Kistner—is he wishing those bottles to be full of wine?
5. Karesh—one Southern rebel who still hates to wear shoes.
6. Ebeling—the president tries to learn a fish story.
7. Krasner—he's got a handful of something, wonder what?
8. Campagna—are you looking for a cue, Tony?
9. Haimovitz—believes in art for fun's sake.
10. Zeender—a moment's pause from scholarly pursuits.
11. Carliner—class politician digs around a little.
12. Witman—glasses and mustache make up a studious type (?).





1. Steinberg—wonders what color it'll be this time.
2. Kirshen—methinks he pours with a practical hand.
3. Bruckner—don't blow us up, pal!
4. Vine—can it be there's a stench to that tube?
5. Fales—whistles for a home where Foley won't roam.
6. Richman—that's one way to heat it up, old boy.
7. Machen—Gus jits the life fantastic.
8. Trommer—and then came the dawn!
9. Stillwell—"Marching Through Georgia" isn't his favorite refrain.
10. Lavine—class comic mixes a drink.
11. Kramer—a well balanced man checks up on himsef.
12. Brown—Colorado sent us a good man.

THE 1939 Mirror Staff wishes to present a yearbook of which we feel justly proud. Each member has given his best contributions in an earnest endeavor to improve upon the splendid book published last year. If we have aimed too high, we refer you to the Browning quotation "A man's reach should exceed his grasp, else what's a heaven for."

A chronicle of the year's student events, including studies, dances, sports, and meetings, are all recorded herein, with the effort to give proper recognition to the splendid faculty which has helped this senior class to prepare itself for establishment of successful private dental practices.

Interesting and picturesque ideas and presentations are the product of tedious concentration on the part of the entire staff, student and faculty alike.

For features which meet with your approval you may congratulate the staff; while material not up to par must be blamed on the editor, who nevertheless has tried his best and may have fallen far short of his goal.

To the students of the Baltimore College of Dental Surgery, we tender this book with the hope that it will merit a prominent place in the library of your fondest memories.

The Editor.

THE *Journal*, after its third year of publication, has finally assumed a permanent and important place among the publications of the Dental School. Through it the School is able to present to the undergraduates and graduates a record of their various activities. It affords both students and alumni effective means for publication of their writings.

During the past three years the *Journal* has printed a series of sketches of buildings occupied by the Dental School from the past to the present. An annual feature of the *Journal* is the publication of an abridgment of the prize-winning thesis of the previous year. Since the *Journal* is received by all alumni, the June issue has featured the announcement of the program of Commencement Week Activities and has served to stimulate interest in these events.

We are looking forward to the publication of a special Centennial edition in March, 1940, which will feature articles on the history of Dentistry and the founding of the first Dental School in the world.

THE Ferdinand J. S. Gorgas Society was founded in 1916 by a group of men interested in widening their horizons and maintaining the high ideals for which they stood. Headed by our present Dean, Dr. J. Ben Robinson, they appropriately named the society after one of the guiding lights in studious application, a former dean of the dental school who is reported to have spent all but two or three hours out of every twenty-four in study and research. Dr. Gorgas represented all of the principles upon which the society based its existence.

This society was not established as an honor society. However, in 1926 a constitution was adopted which stipulated a scholastic average of 85 per cent for the first two years of professional study, good moral character and a proper professional attitude as the requirements of admission. At this time a key was adopted, the design having been worked out at the request of Dr. Walter Oggesen, present Associate Professor of Crown and Bridge Technics, by Dr. Hubert S. Plaster, his roommate at that time, now practicing in Shelby, N. C.

This year the society is under the guidance of Dorsey R. Tipton, President. Thirty-six members of the senior class and eleven members of the junior class attended the banquet and dance which was held on November 22, 1938, at the Southern Hotel. The members of the junior class were attending as initiates. We were fortunate in having as guest speaker Gardner P. H. Foley, Instructor of English in the predental classes, who spoke on "Post-Prandial Jocundities." Dr. Herbert F. Gorgas, son of Dr. Ferdinand Gorgas, was introduced and gave the members a few highlights in the life of his famous father. Dr. Adam Bock, a former Gorgas man, was an excellent toastmaster and Dr. T. O. Heatwole, former Dean of the School of Dentistry, presented keys to the newly-initiated members.

Fraternity History

DENTAL education having had its inception in Baltimore with the establishment of the Baltimore College of Dental Surgery in 1840, it is noteworthy that the Psi Omega Fraternity was also organized in the same city in this, the first dental school in the world, beginning in 1892 as the Alpha Chapter.

One of the foremost founders, Dr. Herbert S. Edrington, is at present living in New Orleans, Louisiana, where he is enjoying the friendship of his brothers of the Delta Omega Chapter. While still a dental student, Brother Edrington, feeling the loss of the fraternal associations he had previously enjoyed in the University of Virginia Law School, conceived the idea of organizing a dental Greek letter fraternity. He proposed formation of such a society to Brother C. J. Schmetzer, and these two enlisted the aid of Brothers Bernard Barr and Phineas E. Horton to work out the details. In Brother Edrington's own words, "Thus was born the Psi Omega Fraternity with its altruistic motto 'I serve'." He was its moving spirit and Grand Master for a number of years, participating in the founding and chartering of the next two chap-

ters—Beta at the New York College of Dental Surgery, and Gamma, at the Philadelphia College of Dental Surgery.

Other schools rapidly contributed to the ever-widening stream until, at the turn of the century, Psi Omega boasted twenty-three chapters, the Phi Chapter of the University of Maryland Dental School being among their number. Since that time the membership has advanced with great strides. In 1924, with the amalgamation of the Baltimore College of Dental Surgery and the University of Maryland Dental School, the Phi and Alpha Chapters joined hands to become the Phi-Alpha chapter. The name of Phi-Alpha Chapter was changed to Alpha on January 11, 1939, by order of the Supreme Council upon petition of the Oriole Alumni Chapter and Phi-Alpha Active Chapter, thereby evidencing our claim to a continuous growth out of the mother chapter.

The rapidity of growth indicates that it fills a niche in the lives of men of the dental profession which is of as great importance as knowledge or technical skill, the great and everlasting need for personal communion and brotherhood. More than any other agency, the fraternity serves to bring together men of similar interests and mutual problems to the end that the association may be beneficial in maintaining the standards of the profession, bring about advancement in the scientific aspects, and fulfill a heartfelt desire for pleasant companionship.

Today Psi Omega fosters thirty-six active chapters with a world-wide membership of over nineteen thousand professional men. After graduation, the sixty-one alumni chapters provide for continued fraternal affiliation. Here in Baltimore, our own Oriole Chapter is widely known for its useful activities.

Our official publication, *The Frater*, maintains a close contact between the chapters. This quarterly fraternal mouthpiece is not at all limited in scope, containing not only reports from each active and each alumni chapter, but also news of individual brothers who have brought distinction upon themselves and our fraternity, human interest articles, strictly dental discussions of technical problems, some recent state board theoretical examinations, jokes, and timely comments by the Editor, John E. Gurley, of San Francisco, California. Upon receipt of his copy, each member regularly scans its pages for news of the activities in which his brothers are engaged, for pleasure and mutual advancement.

G. C. Blevins.

Fraternity History

ON DECEMBER 3, 1893, through the efforts of Dr. C. J. Grieves and a few of the students of the Dental Department, the Eta Chapter was formed. This Chapter has the distinction of being the first Greek-letter Fraternity formed in the University of Maryland and is exclusively dental.

The object of this organization is to promote a fellow-feeling among its members and to bring congenial fellows together for social activity and also for the discussion of dental subjects, thus assisting to prepare them for their life's work.

There exists in the Fraternity nothing but the best of feeling for those of our friends and classmates who are members of similar organizations or are not members of any Fraternity; but of course those men who are Fraternity mates are more closely drawn together by their intimate association.

Every year the Fraternity issues a diploma to each of its members graduating in Dentistry from the University.

On February 8 of this year, the Golden Anniversary of the founding of Xi Psi Phi was fittingly celebrated at the birthplace of the Fraternity, Ann Arbor, Michigan. This gala occasion was observed by thousands of fraternity members throughout every one of our college chapters.

Xi Psi Phi Fraternity was founded at the University of Michigan, February 8, 1889, by six freshmen, Messrs. Theyer, Gory, Deyol, Waterloo, Booth and McCoy.

It was the second dental fraternity organized and the first to become international in its scope, with the establishment of Omicron chapter at the University of Toronto in 1899. Today we have twenty-five active chapters with a roll of some 1600 members.

It is governed by a Supreme Chapter Board of Directors of seven men—the Supreme President, Supreme Vice-President, Supreme Secretary-Treasurer, Supreme Editor and three directors. The Supreme Chapter meets biennially in February, as near the time of the founding of the fraternity as possible.

A diamond arrow, signifying faithful service, is inserted in the regulation fraternity pin, showing Supreme Chapter membership.

A life insurance plan was adopted in the year 1925 whereby every initiate becomes a Life Member upon graduation.

Fraternity History

In the thirty-one years of its existence in Baltimore, the Zeta Mu chapter of Alpha Omega has observed the rapid growth of its international family with great and justifiable pride.

Starting with a small group of men who strove with a definite, common purpose in mind, we have shown a growth and development far beyond the most sanguine expectations of its founders. With a roster of only two chapters (including Zeta Mu) at its inception, Alpha Omega now numbers 34 active undergraduate chapters, and innumerable alumni groups with a membership of close to 3500 practitioners. The domain of Alpha Omega lies not only within the borders of our own country, but also in Canada.

We pride ourselves in the achievements of our members whose research and advanced study have contributed to the great advances of our profession since the still-recent rejuvenation it has undergone, with the beginnings of research in dentistry. We rejoice in the contributions of Alpha Omegans to the emergence of dentistry on higher scientific planes. To observe this more clearly, one has only to consider the number of Alpha Omegans on the faculties of the Dental Schools of this country and to read the results of their work in the Dental Journals.

The fraternity spirit is expressed in the words on our seal, "HARMONIA, AMOR, et VERITAS;" in effect, good scholarship, clean sportsmanship, and a bearing worthy of the profession we are assuming. We ascribe our vigorous growth not only to our ideals and traditions, but to the fact that our predecessors had the courage of their convictions, translated into tremendous work in the direction of their dream of a greater Alpha Omega. It is clearly evident that their efforts have not been in vain.

L. E. Schiller.

Fraternity History

Epsilon chapter of the Sigma Epsilon Fraternity is again proud to report that through its unswerving and vigorous efforts to make our fraternity as ideal as possible, we have succeeded in establishing bonds of brotherhood and good fellowship which are helping to make our school days such that we can always look back upon them as cherished memories.

Sigma Epsilon Delta Fraternity was founded at the New York College of Dentistry in 1901, thus marking the establishment of the oldest Hebrew dental fraternity in the world. The various chapters are limited to the Eastern coast and thus through geographical contiguity we are able to keep in close fraternal contact during both our undergraduate and graduate careers.

We have chosen for our object the promotion and perpetuation of fraternalism, as well as the highest excellence in the science and art of Dentistry and its collateral branches. Through the medium of fraternal cooperation we hope to bring about a closer union of the undergraduate and graduate bodies in order to help the members attain the highest standards of the profession.

The Epsilon chapter at Maryland was founded in 1912 by a group of nine men. Since then we have risen in membership to our present status of forty-nine active members and to a prominent place in interfraternity and school activities. We are proud of our high reputation for scholastic excellence, fraternalism and hospitality. Our keynote is based on the theory of sincere friendships, and with that ever in mind, we cannot fail to maintain the success of our chapter.

To fraters Frank Aaronson, Bernie Auerbach, Len Goldstein, Leon Meinster, Seymour Rabinowitz and Bernie Waldman, and to the entire class of 1939, the Epsilon chapter of Sigma Epsilon Delta wishes God-speed and the best of success.

Leon Meinster.
S. Belinkoff.

Why I Studied Dentistry

•

Being the Frank Confessions of Certain Seniors

•

Miss Toomey knows my family.

After four years at Siwash, I still didn't want to go to work.

My father is a dentist.

The school is so near to my home—

I like to work with my hands; to make prosthetic plates that are really objects d'art.

I am a Sadist. I love to see people squirm.

They say there is dough in it.

I am the eldest of fourteen children; my parents figured that in the end they would come out even on my education.

Dentistry is my hobby. I decided to practice it.

I'm a very little man, but at my chair I can be a stout fella.

The old "Doctor" stuff gets me.

In this profession a man has got to stand on his own feet.

Her father has dough—it was "Doc" or else.

I tossed for it—Ah, the actor I might have been.

My father is getting along and he wants me—

I like to talk uninterruptedly while I work.

I want to help my fellow man.

I couldn't think of anything else to do.

My curiosity got the best of me.

I wanted to get my dental work done free.

I thought I'd look good in a white gown.

Girls like to keep their teeth in good condition, and I like girls.

Children need a gentle person to do their dental work.

I am an artist at heart. I want to make beautiful mouths.

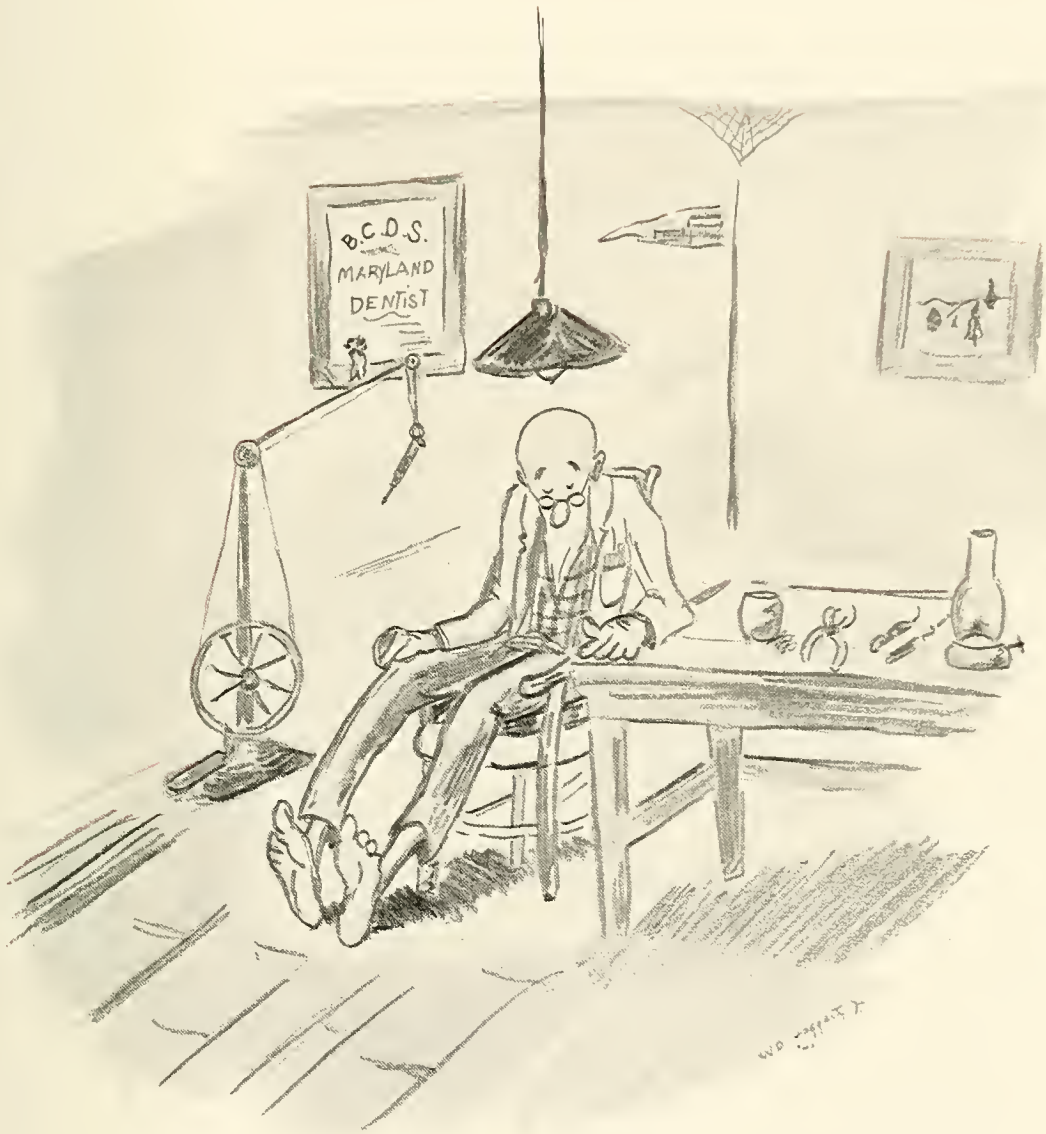
I want to do unto others as others have done unto me.

I had more money than I knew what to do with.

I love hard work.

My uncle died and left me his dental equipment.

My father was a gold prospector and I, being my father's son, decided to—



The Passing Parade

Senior Prophecy for 1949

Aaronson—is an instructor in the children's clinic at the University of Maryland. He speaks with an Italian accent.

Allen—is Mayor of New Martinsville, and is being mentioned for the governorship in the coming election.

Auerbach—has given up dentistry and is peddling college banners, plaques, etc. all over the East.

Barsamian—runs a wheel in the Casino at Monte Carlo. He finances a free clinic for the children of indigent dental students.

Blais—Bunny has had a couple of nervous breakdowns from overwork. He and Tony Carvalho started practicing together and now have adjoining offices.

Blevins—has his office in a trailer and tours the country with his combined medicine show. He says, "Boys, take the National Boards—because you can't keep a good man down."

Brown—is delving into politics and has turned out to be a baby-kisser and a killer-diller with the ladies.

Cannaday—we are glad to report, is president-elect of the American Dental Association. His 50-inch waist and slick, shiny head add to his prominence.

Carvalho—Tony and Blais, having adjoining offices, are always seen together. In fact, it's Blais that now buzzes around and Tony who is never, never gassed!!

Cavallaro—went to South Africa to practice. He is doing well, according to the girl he left behind.

Chan-Pong—Trinidad boasts of Chan-Pong not only because of his dental ability but because of his American jokes. "Chang" is doing his part in supplying the University of Maryland with future students. He now has five sons lined up and waiting.

Davis—is superintendent of the clinic of the dental school. 'Nuf sed.

Miss Dunn—is the most successful dentist in Connecticut and has a fine family besides.

Edgar—after ten successful years in practice bought out the S. S. White Company, which he now runs.

Eichenbaum—stays home and takes care of the house and children while Naomi is bringing home the bacon—or rather salame.

Fallon—is a consulting dentist and an ace diagnostician. His radio talks are making him famous.

Feindt—has turned out to be a regular dandy with the ladies and has three wives listed in the ex-group.

Francis—has become so emaciated and anemic that his practice has practically deserted him.

Gane—has turned out to be quite a cynic on life and especially about women. He limits his practice to men only.

Gilden—is reported to be the best operator in this state. He is so good that all the dentists go to him.

Goldstein—because of a determined widow, sold his office and joined the French Foreign Legion.

Gorsuch—is a conscientious practitioner and his practice has enlarged so that he now has three assistants and a four-chair office.

Griesbach—has turned author and replaced Black's "Operative Dentistry" with his own work.

Grove—is President of the Maryland State Board of Dental Examiners.

Hirschman—has given up dentistry for the thrilling life of an ambulance driver.

Hoffacker—has a fine suite of offices occupying the entire eighth floor of the Medical Arts Building. He employs Drs. D. A. Browning, McCarthy and Dorsey.

Jacoby—is in the hospital recovering from septicemia due to infected teeth.

Jakob—recently graduated from Hopkins Medical School with honors and is doing research in the Mayo Clinic.

Miss James—is practicing dentistry in her home town. The fellows who bet she would be an old maid are collecting.

Johnson—Is skiing from house to house, with a dog team pulling his chair and engine on a sled.

Joyce—is in line for the Deanship of the University of Maryland Dental School. In a year or so all the political ropes will be ready to pull.

Kader—is working for Miller, but he hopes to earn enough to buy an office of his own.

Krug—has been most active in socializing Dentistry. His practice has grown immensely because of his industry along these lines.

Labasauckas—spends most of his time on his farm milking cows—but he fills a cavity now and then.

Legum—has given up his practice to devote his time to his hobby, just playing around. He is doing quite a good job of it, too.

Maislen—is one of the most famous orthodontists. He and Dr. Anderson are collaborating on a new orthodontia classification to replace that of Angle's.

McConnell—is teaching "p. chem" at Northwestern and studying malocclusion from a chemical standpoint.

McCracken—has retired from practice now that his little girl is known as "Shirley Temple II."

Meinster—teaches oral surgery in University of Maryland Dental School. He advocates antiphlogistine and prontolin for acute infections.

Melson—has invented a combination articulator and vulcanizer. He claims that if you put impressions, teeth and rubber in the machine, a perfect set of plates will come out.

Miller—hires Kader to take care of his office while he runs his studio of the dance. He does some hot stepping himself in a floor show in East Baltimore.

Morris—is still studying child life. His own laboratory has a collection of six of his own. He intends to begin practice on completion of this study, which may take four or five more years.

Myers—spent several years experimenting and claims he discovered a compound to prevent caries. But it seems Melvin, Jr., used the formula to build a fire.

Plaster—has had several reverses but is at last on his feet and we hope that the future will brighten Harold's bachelor existence.

Rabinowitz—and Robinovitz were named receivers for Ransom and Randolph Company so that R and R could still be used as the trade mark.

Randolph—since announcement night when he contracted amnesia from a flying bottle in the Idle Hour, he has been trying to find Lost Creek.

Robinovitz—see Rabinowitz.

Rogers—is professor of prosthetics at the University of Maryland Dental School. He says, "Prosthetic dentistry is here to stay."

Rosen—has become a resident of a small upstate town of New York. His practice keeps him well tied down with work day in and day out.

Schoepke—has a Hollywood practice and just recently limited his patients to actresses of the major companies. His wife is the famous Betty La Rue Fox who won last year's Academy award.

Schriver—has given up his dental practice to devote his entire time to concert tours. He is the famous violinist of the day, having replaced the great Albert Spaulding of a few years ago.

Shaudis—has given up dentistry and is banging the bass fiddle in a honkytonk cabaret.

Shea—is writing textbooks on Dentistry, rather than practicing it. Some say he's entirely too radical in his theories.

Sidoti—is one of the pioneers in the new system of "Family Dentistry."

Stinebert—his friends rarely see Eddie any more. He's been keeping his nose to the grindstone and working overtime since he started practicing. He's even lost his love of golf.

Tinsley—has been changed by marriage so that few of his classmates would recognize him. He's a settled, refined, most respected elder of the church.

Varipatis—built up a wonderful practice but is fast losing it since he's been playing around with all the show girls. The chorus girls are allowing him little free time—for dentistry.

Weiner—teaches at Harvard Dental School. He heads the Radiodontia department there and is a national authority on X-ray technic.

Wooden—is making a wonderful prosthetician. Yes, he's specializing in prosthetics and is teaching down at the University of Maryland Dental School in his spare time.

Wright—is associated with Duke University and is considered one of the most notable contributors to the support of the Duke football team.

Sport Snaps

1. We didn't know Maxie had a daughter.
2. Kader and Johnson unlax with golf.
3. This is Tipton on his ice skates.
4. Pool room sharks.
5. The hunting appears to be good today.
6. That's Eddie with his "par pose."
7. They're not in step. Can the scores be the same?
8. Eddie always harbored a secret desire to be a mechanic.
9. Now, where did that slice take his ball?
10. The editor swears by tennis, too.
11. Dr. McCarthy and students register dismay at a Maryland football team faux pas.

Miscellaneous Snapshots

1. Kader and Weiner pretend nonchalance at disappointments.
2. Frank Taylor engages in sly competition.
3. Easton and Callaway demonstrate Southern exposure.
4. Who said Tinsley could stand alone?
5. Cliff at his stand where we eat and get our shines.
6. Baldy Plaster poses without his number.
7. George Blevins strikes an impish pose.
8. Weiner poses with an invisible snore.
9. Maxie, do you question the identity of Irving's beverage?
10. The photographer catches part of the staff in a corner of the Psi O House.

4

1. Morris—the best dressed member of the senior class.
2. Chan-Pong—judged the most conscientious of us all.
3. Plaster—'twas deemed he was the best technician.
4. Shea—they said he was the laziest; but maybe they mean the cleverest.

Class Votes

1

2

3

4

1. Randolph—the most popular, by a unanimous vote.
2. Blais—the best athlete, or so history tells us.
3. Carvalho—Oh, surely, 'tis Tony who gets the most fun out of dentistry.
4. Stinebert—the class crooner, or hadn't you heard?

Dental Humor

"Summum Bonum" was misinterpreted by Grove and appeared in his notes as "skin and bone."—Was his mind on the lecture?

VARIPATIS: "Where'd you get that class II malocclusion, chewing cigars?"
BROWN: "Well, where'd you get that class III, leading with your chin?"

STINEBERT: "Look at the wave in my hair."
TIPTON: "Yeh, waving goodbye."

MELSON: "Radiodontia gave my only mark of *A*. I've already ordered an X-ray and a chair. Evidently all I can do is radiographic work."
MORRIS: "Not a single *A* for me. My grades are too bad to even practice. Guess I'll have to stay on as an instructor."

"Does she like petting?" inquired a young man as he looked over a Great Dane.

The Eskimos are not the only Lap landers.

"He's got that certain thing," said the chorus girl as she got a peep at her entertainer's hip pocket.

Waldman worked in a rubber factory making $40 a week with possibilities for advancement. He quit—Why? He had to make rubber dams.

"Haste makes waist," is a good old saying.

Evolution is the number of times a wheel turns around.

"We Just Couldn't Say Goodbye," sang one of the Siamese twins.

MORRIS: "The Queen of England would have made a fine orthodontist."
LABBY: "Why?"
MORRIS: "I hear she's always pushing the crown."

PLASTER: "That's right, Dr. Latcham."

Women want a man with a heart of gold—the kind they can spend.

VARIPATIS: "Now, tell me when I grind, does it hurt on the mesial or the distal?"

DR. KARN: "Carvalho, explain the difference between intraoral and extraoral pictures."

TONY: "Well, for intraoral the film is placed inside and the machine outside. For extraoral, it's vice versa. I just love to do extraoral work."

JAKE: "Drat it all, a dentist hasn't got a chance. No matter how good his work is, somebody always spits on it."
MORRIS: "Sure enough. But then, every dentist is down in the mouth."

We wonder how good the girl from Randolph-Macon would be at Macon-Randolph.

Lower plates are like relatives—They are always popping up when you least expect them. Yes, and upper plates are like man and wife—always falling out.

Faculty Activities of the Year

At the annual convocation of the American College of Dentists in St. Louis, October 23, 1938, Fellowships were awarded to Drs. G. W. Gaver, Harold Goldstein, R. C. Leonard, and H. B. McCarthy.

In 1938 Drs. H. E. Latcham and H. B. McCarthy did research work for the United States Bureau of Standards on the behavior of silicate cements.

CLINICS AND PAPERS OF THE YEAR

M. S. Aisenberg:

March, 1939—Southern Society of Orthodontists.
Paper on "Root Resorption and Ankylosis."

G. M. Anderson:

October, 1938—Delaware Academy of Medicine.
Paper as part of a symposium on "Relationship of Medicine and Dentistry."

December, 1938—Dental Surgeons Association of Baltimore.
Paper on "Inaccuracies in Our Literature."

February, 1939—Ninth District Society of New York City.
Paper on "The General Practitioner in the Field of Orthodontia."

March, 1939—Southern Society of Orthodontists.
Paper on "Aspects of Prevention of Malocclusion."

May, 1939—Pennsylvania State Dental Association.
Paper on "The General Practitioner in the Field of Orthodontia."

D. A. Browning:

December, 1938—Monongahela Valley Dental Society of West Virginia.
Paper on "Direct Inlay Pattern Technique."

B. M. Dorsey:

December, 1938—Baltimore City Dental Society.
Paper on "Exodontia."

December, 1938—*American Journal of Surgery.*
Collaborated article on "Fractures of the Lower Jaw."

G. W. Gaver:

December, 1938—Baltimore City Dental Society.
Paper on "Full Denture Prosthesis."

March, 1939—Five State Post Graduate Clinic.
Clinic on Full Denture Construction.

Harold Goldstein:

October, 1938—Shenandoah Valley Dental Society.
Paper on "C Avitaminosis and Its Relation to Gingival Disease."

November, 1938—Study Club of Washington District Dental Society.
Illustrated Lecture on "Fundamentals of Oral Diagnosis."

December, 1938—Southern Maryland Dental Society.
Illustrated Lecture on "Periodontal Disease and Its Relation to Body Disease."

March, 1939—Missouri State Dental Society.

Paper on "Oral Diagnosis."

An Article in *The Journal of Dental Research* on "Differential Diagnosis of Vincent's Infection and Erythema Multiforme."

K. F. Grempler:

March, 1939—Five State Post Graduate Clinic.

Clinic on The Application of a Mortise in Cavity Preparation.

June, 1939—Alumni Clinics of June Week.

Table Clinic on Amalgam Restorations.

H. T. Hicks:

March, 1939—Five State Post Graduate Clinic.

Clinic on The Elimination of the Periodontal Pocket. (Surgery—Electrocoagulation Chemical).

O. C. Hurst:

March, 1939—Five State Post Graduate Clinic.

Clinic on Indirect Impressions, Dies, and Wax Patterns for Three-quarter Crowns and Inlays.

B. B. Ide:

September, 1938—Maryland State Dental Society.

Clinic on Amalgams.

C. L. Inman:

September, 1938—Maryland State Dental Society.

Clinic on Abnormalities of the Mouth.

October, 1938—Cecil-Harford County Dental Society.

November, 1938—Southern Maryland Dental Society.

November, 1938—Eastern Shore Dental Society.

Illustrated Lectures on "Methods of Removing Difficult Teeth and Cysts and Treating Osteomyelitis."

March, 1939—Five State Post Graduate Clinic.

Oral Clinic on The Use of Nitrous Oxide and Oxygen Anesthesia and Analgesia in Dentistry.

V. D. Kaufman:

March, 1939—Five State Post Graduate Clinic.

Clinic on Clinical Control of Hemorrhage.

G. C. Karn:

February, 1939—Southern Maryland Dental Society.

Clinic on X-Ray Technique and Diagnosis for the General Practitioner.

H. B. McCarthy:

November, 1938—Potomac Valley Dental Society.

Paper on "Cavity Preparations and Amalgam Restorations."

(Continued on page 166)

Medical History of the Typical Dental Student

Name—D. D. S. To be.
Age—Sometimes we wonder.
Sex—Yes.
Race—At Bowie, Havre de Grace, and Pimlico.
Color—When?
Height—Towering (in his own estimation).
Address—What kind do you want?
Occupation—A little of everything except bill collector.
Income—Not now, but just wait.
C. C.—(Current Complaint) Fatigue.

General appearance—Smooth and dangerous (in more ways than one).
Poise—What poise?
Carriage—Only a "U-Drive-It" kind.
Head—Too big.
Hair—Here and there, mostly where?
Eyes—Double; active in presence of females; inactive in classes.
Lips—Overworked.
Teeth—Everywhere, even in his pockets.
Chest—Inflated.
Hands—Capable and plenty fast.
Feet—Generally dead, but quite jittery at formals.
Stimulants—On special occasions.
Appetite—not easily satisfied.
Sleep—Always being disturbed.
Favorite amusement—Must we tell?
Saddest words in life—"I should say not."
Sweetest words in life—"Yes, honey."
Favorite color—Red, especially in neckties.
Favorite flower—Rose, lily, violet, and?
Aim in life—No work and all fun.
Favorite hour of the day—Five P. M.
Favorite season of the year—Spring, of course.
Motto—After me everybody else comes first.
Marital status—Questionable.
Progress—In certain lines.

P. H.—(Past history)—Lurid.

F. H.—(Family history)—Well, well, well!!!—Lucky so far. Parents? Of course.

P. I.—(Past illnesses)—Too many. Childhood diseases—Mumps, Measles, Whooping Cough; and I still have the itch.
Operations—336 haircuts and 6 extractions.

AMPHI THEATER

Previews of Coming Extractions

Thursday Afternoon, 2 o'clock

(PLEASE DO NOT EAT LUNCH)

THE SNIFTERS' CLUB

PRESENTS

THE OPERA-TION

FEATURING

DORSEY'S INSTRUMENTAL ENSEMBLE

DR. CONNIE (CERT) INMAN

GES CONDUCTOR

Supported by the one and only

SENOR CLASS

Hear the lovely Aliceo L. Chinamano sing a selection from "The Cat and the Fiddle," with Kauffman.

Don't miss that superb aria "Summum Bonum," sung as only the magnificent Jaybenoso Robinsonoff can render it.

You'll never forget the entrancing "There'll Be a Hot Time in the Old Crown Tonight," when the Pulpcappers' Chorus sing their way into your hearts.

Memories

Those big, wooden tooth-models, covered with dust,
Initials carved deep on the distal cusp?
That creaky, old Church Building, gloomy and dark,
Where Gas was the monarch, grim and stark.
Who could forget that Prosthetics Lab
Where plaster and wax on our gowns we would dab?
Our Mechanical Drawing sure was a mess;
Mr. Platt to that fact would often confess.
And here's to the eight o'clock classes, gone by;
Hollow-eyed freshmen sipping coffee on the fly.
Sometimes the morning periods ended quite soon,
To the pool hall and movies we'd flock in platoon.
Then there was the Dean's Office, always in the background,
Where those who got a talking-to emerged with their tails down.
Silicates, amalgams, inlays, and foils;
Lord! How those monsters kept us in the toils.
The first Christmas holidays were welcomed with a sigh,
What a big relief it was to bid Baltimore goodbye.
Gas was the thing that always got us down,
And how we used to worry in that cute white gown.
The library girls we never shall forget,
Overdue books are still a part of our debt.
Those Sophomore techniques were what made us lose our hair;
When we finally turned them in we went out on a tear.
Gone are the teachers, in their gowns decked with blue,
Who did their downright level best to teach us all they knew.
We salute you, oh den of painless extraction,
Where first we learned about the "force of traction."
Assignments in the X-ray room were pleasant on the whole,
But an hour in the dark room left us blind as a mole.
Our first Root Canal was one lovely mess,
The patient said "How cute" when Iodine spilled on his vest.
That Rubber Dam clinic, how we sweated and strained,
To get the necks inverted, using language so profane.
We will miss the grand old dances that we had during the year,
And the sweet little girls left in Baltimore so drear.
So goodbye to you, Jim, and to you, too, John and Joe;
Our school days are over—we'll miss them, that I know.

E. L. Pessagno.

Acknowledgments

FIRST, of a letter to your editor from *Esquire's* famous artist, George B. Petty. Being a response to a letter from said editor requesting one of Petty's artistic drawings for our feature section, it illustrates the sportsmanship and humanness of an artist who receives hundreds of dollars for such sketches as appear on the opposite page; and yet can make one available to a college yearbook merely because he has been made to understand the intense gratitude that would be his from staff and students alike. He must receive many such requests; and, conscious of our good fortune, we can assure him of our continued admiration and goodwill.

David A. Smart, referred to in the letter, proved himself one man in a few, and gave the editor permission to duplicate any "Petty" drawing that had appeared in *Esquire*, "The Magazine for Men." We are deeply appreciative to Mr. Petty, to Mr. Smart, and to the publication for the extension of such a magnanimous favor.

* * *

All division pages were posed for by Miss Marian Thompson of Danville, Va.

Miss Thompson has posed in publicity photographs for the American Tobacco Festival held in South Boston, Va., for the past several years, appearing in newspapers and on magazine covers.

Miss Thompson very graciously lent her artistic ability to enable the staff to portray the theme carried in all division pages of this 1939 MIRROR.

Mr. Max Merin, of Merin-Baliban Studios, is responsible for the striking photography of this artistic model.

* * *

Occupying prominent places on many of the preceding pages are contributions *per se* from our photographer, engraver, and printer. Many portrayed features were neither contractually stipulated for, nor were the contributors pecuniarily reimbursed. They represent unusual efforts toward cooperation with a limited budget. We wish to express our genuine gratitude to:

Merin-Baliban, Photographers.

Advertisers Engraving Company.

Brown-Morrison Printing Company.

* * *

To Mr. George Wall, for his strikingly artistic work from a portrait. This appears on page fourteen.

"Well, we could go to the opera, Mr. Hammond, if you insist on preliminaries."

Leonardo da Vinci is credited with being the most versatile genius of his time. Artist, court favorite, sculptor and engineer - he was equally proficient at everything he essayed.

da Vinci alone was the complete artist

Yet da Vinci himself - master that he was - habitually sought the assistance of specialist artists, and hired many to assist him. Seligman & Hite have this in common with da Vinci. This laboratory is proud of their technicians, each technician, possesses talents which enable him to excel in his chosen line.

Your suggestion to call on us at anytime is always welcome.

BUILDING A SUCCESSFUL PRACTICE

Far seeing dental graduates appreciate that quality equipment means a satisfactory income. Ritter equipment is quality equipment — and a well chosen investment. Then too the Ritter Company is the only organization with a well organized plan to help you to quickly build a successful practice.

1. Graduate selects Ritter equipment . . . is surprised at small monthly payments.

2. Ritter's Statistical Department recommends best locality for greatest opportunity.

3. Ritter representative personally gives the young dentist sound advice on specific problems.

4. Ritter's Architectural Service lays out his attractive and efficient office.

5. Ritter's Practice Building Service . . . Every two weeks, for a year and a half, this Service brings him the solutions of problems that are tried and proven methods of successful dentists.

6. Personal problems of Practice Building answered by competent practitioners associated with the Ritter Practice Building Service.

7. Ritter's Educational Division helps him build a profitable children's practice by advising him how to win them to his office.

8. THE RESULT: A profitable practice in but a fraction of the time required by "trial and error" methods — equipment quickly paid for out of the income that Ritter helped him make. The Ritter Dental Manufacturing Company, Inc., Ritter Park, Rochester, N. Y.

SOME ANSWERS AREN'T IN THE BOOKS

The hardest questions in your entire training are those you have to answer *after* graduation.

Where shall I locate? How shall I open my office? What about financing? You know all the questions by heart. But no text book can tell you the answers—because every year, for every man, the answers are different.

We believe we can help. For instance, up-to-the-minute statistics and *personal experience* enable us to recommend desirable locations either in this city or elsewhere. For any city, we can tell you the population, the number of practicing dentists and exactly what the opportunities are. We can give you expert, impartial advice on equipment and on the thousand and one details necessary to open your office.

For the answer to
"Where do I go from here?"

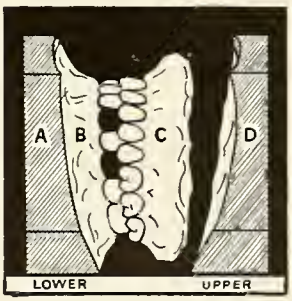
1—Pouring plaster into Rubber Model Former

2—Setting anatomical cast into plaster



3—Mounting upper and lower to articulate

The New Columbia
RUBBER
Model Formers

The Easy Way to Make Neat Study Models

IT'S actually easier, quicker and cheaper to make perfectly symmetrical, finely finished study models *with* the Columbia *Rubber* Model Formers than it is to make the usual unsightly mountings.

Just pour plaster into the model former, mount the anatomical cast and let set. The soft, pliable rubber permits easy removal of the model which comes out smooth and finished with an indented panel for the patient's name and other data.

Upper and lower models, made in these formers, occlude automatically.

Made of a soft, pliable but tough rubber.
They're built for service and will last for years.

Price per set—1 upper and 1 lower Rubber Model Former — $2.75

Study models show patients their mouths as you see them.
Use study models as regularly as you do X-Rays.

PROFESSIONAL SUCCESS

A well planned successful professional future calls for a thorough knowledge of the appliances that one must work and live with in the practice of dentistry in the years to come.

We can counsel you no more sincerely than to recommend that you investigate and thoroughly study the merits and values of the new WEBER line of dental equipment. There has been no finer dental equipment ever built than is offered you in the Weber line of today. It is sold by reputable dealers everywhere on very liberal terms and is fully guaranteed to meet every modern electrical and mechanical scientific development, and is prepared in design and priced to suit the most discriminating buyer. All types of helpful services are yours for the asking.

JUST ANOTHER OFFICE?

YOUR FIRST OFFICE . . . how will it look to your patients? Will it be in keeping with the modern, progressive dental techniques you have just successfully mastered . . . or will it be "just another office"? For an office that is different, new, and up-to-date, equip with AMERICAN. The new models, marvels of sanitation and efficiency, are available in any color you prefer . . . any one of them will be the "heart" of a fine, modern, different office.

SAMSON'S SECRET

We are the only ones who make **Samson Rubber.** Moreover, we are the only ones that know how to make it.

The process is a secret.

When we started in 1865, our knowledge of rubber was not nearly so profound as it is now. In our over 70 years of practical experience, we learned how to make **the best** dental rubber and that rubber is **Samson.**

Not the best because we say it is, but because the dental profession admits it is.

Ask the progressive dealer.

The Picture on your Face

Life is like a moving picture,
With your face a silver screen
And your heart a great projector
Of a soul-film in between
And the all-impelling motive
That determines you a place
In life's technicolor drama
Casts a picture on your face.

Just a little sweet-faced baby
Here on earth to spend a while
With a little bit of heaven
In his dimpled baby-smile.
And his soul-film gives the title
Of the drama and his place,
With a something very vital:
It's the picture on his face.

Years of life will bring their sorrows,
Furrows grace or mar the brow.
Heartaches sadden glad tomorrows,
Many times we know not how.
Though you rise to heights of glory
Or you sink into disgrace
Still the world will check your story
With the picture on your face.

Scars of bitter hate will mar you
When you hate the thing that's right
And those scars will surely bar you
From the glory of the fight.
Dissipation's scars will linger,
Beauty experts can't erase
And the world will point its finger
At the picture on your face.

Life and love must live together;
Life and hate must die apart,
And the soul that lives forever
Stars the man that plays his part.
When at last we reach the portal
At the end of time and place
May the verdict be—Immortal!
With His image on my face.

Welty B. Fahrney, D.D.S.
Alumnus '98 U. of Md.
Timberville, Va.
